

## **GIELO MAR R. BANDOY**

**Software Engineer | Aspiring Cloud Security Engineer**

**Email:** gmarbandoy@gmail.com

**Phone:** 09382005896

**Location:** Del Carmen, Surigao del Norte (Open to Relocation)

**GitHub:** github.com/gmarxdev

**Portfolio:** gielo-bandoy-portfolio.vercel.app

### **Professional Summary**

Computer Engineering graduate with practical experience developing web applications using PHP, CodeIgniter 4, Apache, Vue.js, CSS, JavaScript, MySQL, and REST APIs (LAMP Stack) through on-the-job training and freelance projects. Passionate about cloud security and secure software development, with ongoing hands-on training in cybersecurity, Linux, networking, and ethical hacking. Currently progressing through the Google Cybersecurity Professional Certificate while building the technical foundation for a career as a Cloud Security Engineer.

### **Core Competencies**

Software Development, Backend Development, REST API Development, Database Design, Secure Coding Principles, Git, Problem Solving, Continuous Learning, Version Control.

### **Technical Skills**

**Programming:** PHP, JavaScript, SQL, Python, Java

**Web:** CodeIgniter 4, Vue.js, jQuery, HTML5, CSS3, Bootstrap, REST APIs

**Database:** MySQL

**Tools:** Git, GitHub, Kali Linux, Postman

**Cybersecurity:** Linux Administration, Networking Fundamentals, OWASP Top 10, Vulnerability Assessment, Incident Response Fundamentals

**Cloud:** AWS Fundamentals, Cloud Security Concepts (Learning)

### **Professional Experience**

ISOTECH INC. – Web Developer Intern (OJT)

- Developed and maintained business web applications using PHP, CodeIgniter 4, Apache, MySQL, jQuery, Bootstrap, CSS and JavaScript (LAMP Stack).
- Implemented responsive interfaces and integrated REST APIs.
- Participated in testing, debugging, deployment, and maintenance.

Independent – Freelance Software & IoT Developer (2025–Present)

- Delivered custom web applications and IoT solutions for clients.
- Managed projects from requirements gathering to deployment and maintenance.
- Worked directly with clients to translate business requirements into software solutions.

## Selected Projects

### Dormitory Management System

Developed a dormitory management system supporting tenant management, reservations, room management, payment management, reporting, and role-based access control.

### Point of Sale System

Developed a POS system with inventory management, sales tracking, reporting, and receipt generator.

### Smart Indoor Rice Cultivator with Grow Light

Built an ESP32-based IoT rice cultivation system with monitoring, automation, and mobile integration.

### BANCA Mobile App

Contributed to a mobile Sea transport optimization platform for island tourism in Surigao del Norte.

### IoT Automated Seaweed Dryer System (Capstone)

Automated seaweed drying using IoT sensors, relay-controlled actuators, and C++ firmware and Real-time monitoring dashboard with Firebase.

## Education

Bachelor of Science in Computer Engineering  
Surigao del Norte State University  
2021–2026

## Professional Development

- Google Cybersecurity Professional Certificate (In Progress)
- Hands-on Cybersecurity & Ethical Hacking Training (Self-Paced)
- Published a research paper in the *Research and Education Journal* by the Asian Intellect for Academic Organization and Development Inc. (2026)
- Tech Startup Journey (2025)
- BRAINS 2025: Building Resilience through AI for Sustainability (2025)
- Waventures Startup Challenge Workshop (2024)

## Awards & Achievements

- Web Design Champion — ICpEP.se National Digital Olympiads (2026)
- Top 10 Finalist — Philippine Startup Challenge X Regional Showcase (2025)
- Java Programming Champion — ICpEP.se Regional Convention (2025)
- Java Programming 1 — successfully acquired the certificate for the Java Competition - Completion Certificate given by **CODECHUM** (2025)
- 3rd Place — Regional Waventures Startup Competition (2024)
